

EASY CHLOROFILTRE COVER CROP

**The EASY Chlorofiltre® is a simple cover
of the seeds upon destruction.**

EASY Chlorofiltre

20% TABOR Egyptian clover
10% STALA / JULIA phacelia
40% DAIKON Asian radish
30% VITAMINE / ETAMINE
brown mustardr

Number of seeds / m²:

- 188

Following culture:

- Wheat, peas, corn, sunflower,
potato, beet

Range:

- Bio fumigation

Advantages for the card

• Easy of implementation and of destruction

The species chosen for this mix have TKG from 2 to 15. The implantation is very easy and the varieties develop quickly during the summer.

• Very good structuring effect

The DAIKON Asian radish has a powerful root system highly structuring the soil.

It's a true advantage before the implantation of the next crop.

• Nitrogenous restitution

The TABOR Egyptian clover has an important agronomic interest for nitrogenous restitution.

It allows to reduce the C/N ratio for a faster restitution of the nutrients.

SO THAT THEY SITUATIONS?

Short intercropping

Long intercropping

Implementation advices

- Managing the crop residue
- Shallow stubble cultivation from 3 up to 5 cm
- Seed between 1 and 2 cm depth
- Roll to ensure the seed-to-soil contact

PACKAGING
Bag of 10kg

myCHLORofiltre®

myChlorofiltre app is a decision tool dedicated to covercrop. Developed by Cérience, myChlorofiltre is the only app to estimate the cover crop biomass thanks to pictures; it is an innovative tool, easy to use and free !

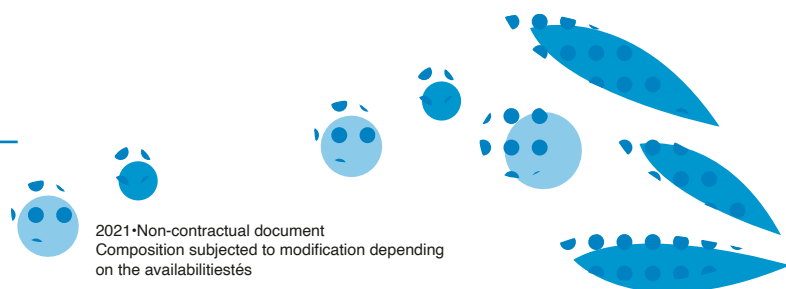

It has 3 complementar services:

- Choosing my cover crop
- Successful sowing
- Estimating my biomass
