L'AGRONOME SEMENCIER

DELIKA

PERENNIAL RYEGRASS

A DELIGHT!

DELIKA

Features:

- Perennial ryegrass
- Diploid

Heading date:

- 03/06

Heading date observed in trials performed in West Central France

Profile:

- Long term

Persistency:

- 4 years and more

Soil types:

- Healthy and deep

Sowing rate:

- 20-25 kg/ha (10-12 kg/ac) as pure
- or in combination with 2 to 3 kg/ha (0.8-1.2 kg/ac) white clover

ITS ADVANTAGES

- An exceptional quality:
 - DELIKA distinguishes itself by its excellent nutritional qualities: high sugar content and high digestibility, key points of an excellent grazing valuation by the animals (24.3% of sugar content and 21.2% ADF - CTPS* trials).
- An early and abundant start:
 - DELIKA is a late-heading variety that stands out through its very abundant and early start.
 - Furthermore, DELIKA resists trampling well thanks to its high tillering ability and its dense and thin foliage.
- A fortress against diseases:
 - DELIKA shows a good health profile (high resistance to blights and helminthosporium), that guarantees a healthy forage and therefore its palatability for animals.

*CTPS = French Technical Committee for Plant Breeding

FOR WHAT USE ?

| | |
|---|---|
| Grazing | Mowing |
|  |  |

Seeding (August-September or March-April):

- Prepare a thin surface soil;
- Seed at a depth of 1 up to 2 cm;
- Roll right after seeding.

Protection:

- Monitor slugs during the implantation and take action if needed;
- Remove the weeds (as early as 3-4 leaves stage) if needed (seek advice from your technician).

Packaging:
Bag of 15 kg

Scores refer to registration trials performed in France. They range from 1 (very low) to 9 (very high)
